

AICC 2019 Student Packaging Design Competition WINNERS

Design to an Opportunity – Structural Challenge

Students had to create a “Hardware Shipper Box” to be sent to customers of a fictional hardware store. The package had to contain (4) traditional 60-watt light bulbs, (1) 16-oz traditional hammer, and (1) box of nails. This challenge focused on the structure of the box so it had to withstand the rigors of courier delivery without anything being broken. Students also had to perform a drop test.
