

# AICC 2023 Student Packaging Design Competition Winners

## Structural Challenge:

Students had to create a "Hardware Shipper Box" to be sent to customers of a fictional hardware store. The package had to contain (4) traditional 60-watt light bulbs, (1) 16-oz traditional hammer, and (1) box of nails. This challenge focused on the structure of the box so it had to withstand the rigors of courier delivery without anything being broken.

## First Place Structure

- [Dunwoody College of Technology](#)
- "DIYAY"
- Xinh Beardmore, Cory Richard Williams, Kristin Benusa

## Second Place Structure

- [Millersville University](#)
- "Ville Hardware"
- Kaylena Travitz, Ben Troyano

## Third Place Structure (tie)

- [Clemson University](#)
- "Penguin Hardware"
- Marc Alvarado, Lindsey Diehl, Thomas Feaster, Emory DeLoach

## Third Place Structure (tie)

- [Appalachian State University](#)
- "Ryllex Hardware Shipping Box"
- Rylee Woods, Lex Smith

## First Place Graphics

- [University of Texas Arlington](#)
- "Tuff Hardware"
- Edwin Barrera, Oliver Harris, Kit Corney, Cassidy Victor

## Second Place Graphics

- [Cal Poly](#)
- "Handybox"
- Tori Nardoni, Kate Perry, Francisca Soherman

## Third Place Graphics

- [Cal Poly](#)
- "Light Work"
- Olivia Cooper, Malia McCaig, Zoe Woomer, Ashley Ho
